KW METAL POWER

"KUMWELL" weld metal powder is contained in plastic cartridge, which is packed in paper box of 10 or 20 pieces depending on powder weight.

The starting powder is compacted in the bottom of the cartridge underneath the metal welding. It can be released by taping the cartridge base firmly. The retaining disc is contained in a separate bag in the box.

WELD METAL POWER

"KUMWELL" type KW Weld metal powder are suitable for making connection for copper to copper, copper to steel, and steel to steel.

ONE TIME UNIT

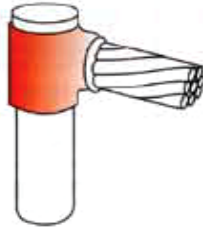

Complete set of ceramic mould, weld metal powder, metal disc and copper sleeve for one connection of cable to cable or cable to rod.

Ceramic mould is special designed and made for exothermic welding procees at high temperature more than 2000C°
